

Assembly Instructions:

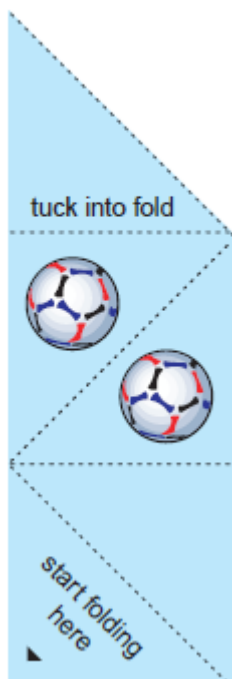

Ball and Goals

- 1.) Print this page.
- 2.) Ball: Cut out the shaded area of the ball and fold three times (maintaining a triangular shape). Tuck in the remaining flap to form a triangular "ball" with soccer ball graphic on both sides.
- 3.) Goals: Cut out the two goals, and fold along the dotted lines so that all of the colored parts are still showing, including the green flaps.

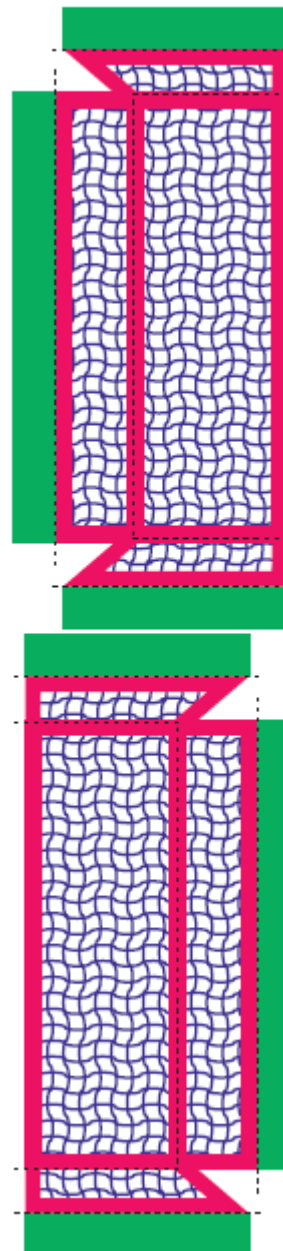

Field

- 1.) Print two copies of page two (the field) on heavy paper.
- 2.) Glue together the two halves, overlapping the midfield line.
- 3.) Glue the green flaps of the goal down onto the designated goal area. The green flaps should overlap the words and the goal design should be on the outside. If you lay the goals correctly, the net should completely cover the goal rectangle.

Ball

Goals

glue area for goal

glue area for goal

glue area for goal

Apply glue in this area for one half of the field

On the other half of the field, cut along the dotted line and overlay the field onto the first half (with glue).
