## Letter From The Authors

Hey Teen Crafters,

We are so glad you have downloaded our first eBook! This eBook is filled with fun crafty school-related projects just for teens! Whether you are preparing to go back to school this fall or your locker needs a midyear makeover, this eBook is here to help. It covers just about everything from home organization to your backpack, and even pens. Oh, and your locker is bound to feel the love as well.

We had so much fun putting this book together and creating all the projects that you see in it. We can honestly say that each and every item you have seen is one that we plan on using when we go back to school this year. We hope you have as much fun creating these projects as we did.

Think of how jealous your friends will be when you have the coolest and most unique school supplies in the class while everyone else has the generic supplies. Don't be afraid to flaunt your creations and start some new trends. Get your friends on board and inspire them to get crafty and create some of these projects as well!

Happy Crafting.

# LACE BACKPACK

Just because last year's backpack isn't in tip top shape doesn't mean you need to purchase a new one. With a little creativity and a few basic supplies, you can make it look brand new!

## Steps:

- 4** Pick up the lace and place it down where you had planned for it to go. Press down firmly.
